

Achieving Cost-efficient Quality

Report Highlights

- p2** The combination of pressures around rising operational costs, production efficiency, and product quality form a complex operating environment for the food & beverage industry as a whole.
- p7** Leaders in F&B start by focusing on production efficiency to achieve OpEx. They outperform their peers when it comes to asset downtime, OEE, and yield.
- p9** Leaders don't lose sight of product quality, achieving 99% production compliance while at the same time possess a lower total cost of quality than Followers.
- p11** While sustainability related costs are often overlooked this is not true for Leaders, who have seen decreases year-over-year in energy, wastewater, and % to landfill expenses.

Based on the experiences of over 170 respondents, this report explores how Food and Beverage (F&B) manufacturers achieve operational excellence. Specifically, how Leaders in the Industry focus on three key areas of their operations — production efficiency, product quality and safety, and sustainability costs — to succeed as a business.
