

Assessing Calculus Reform Efforts: A Report To The Community

There are three primary types of assessment:

ASSESSMENT OF LEARNING is summative and performance-based.	Used this way, assessment judges results against established standards and benchmarks. This most traditional use of assessment can reveal how the learner and the system are performing over time.
ASSESSMENT FOR LEARNING is formative, real-time, and diagnostic.	Used this way, assessment provides immediate feedback both to the learner and to adults on developing knowledge, skills, and dispositions while learning is actually happening.
ASSESSMENT AS LEARNING is self-examination by the learner.	Used this way, assessment supports the development of metacognition , the understanding of how learners learn and who the learners know themselves to be. This use of assessment provides the kind of self-awareness needed to become a better learner and to develop higher-order skills and dispositions.

Assessing calculus reform efforts: a report to the community / [edited by] Alan C. Tucker, James R.C. Leitzel. Other Authors. Tucker, Alan, July 6-; Leitzel.
